

## G.S. Class Wagon 1941

Creator: Western Australian Government Railways (WAGR)

Description: Four wheel, high sided open wagon, suitable for carting bulk grain.

Date: 1941

Item Id Number: g55028

***This is the only remaining example of a G.S. class wagon.*** When built its design was technically innovative and was the forerunner of WAGR "modern" 4 wheel wagons of which many were built (classified by the National Trust 12/10/98)

Back in the 30's – 40's these A Class Steam Locos from the Midland WAGR Yard were the grain movers of the day. Wyalkatchem Museum has a Heritage listed 1941 GS Rail Wagon as used for wheat transport in our region. (Donated by WAGR and Heritage listed 5028).
